

# **BBLC's form for non-binding demand indications by network users for incremental capacity**

**July 2023**

By filling out this form, the network user agrees that the document including all data from the network user, can be shared by BBL Company with other Transmission System Operators for assessing the demand for incremental capacity in the overall system/market area.

## I. Background

In order to harmonize the development process for incremental capacity, rules for incremental capacity have been included in the network code on Capacity Allocation Mechanism (CAM NC). An amended version has been approved by the EU Member States in October 2016 and the Entry into Force date was 6th April 2017.

The incremental process starts with the demand assessment phase that begins with the market demand assessment by BBL Company after the annual yearly capacity auction. Interested parties are invited to submit non-binding demand indications for capacity above the current technical capacity of the BBL interconnector, which is 20,6 GWh/h/yr in forward flow and 7,0 GWh/h/yr in reverse flow. Non-binding demand indications may be submitted until 28 August 2023 by sending an e-mail to [bbl-sales@bblcompany.com](mailto:bbl-sales@bblcompany.com).

## II. Non-binding demand indications

For submitting non-binding demand indications for incremental capacity according to the process described in Article 26.8 of Regulation (EU) 2017/459 please provide the following information:
